Weight: approx. 2,5 kg
Capacity (AMPS): 400 A , 100%
Holes cable Gripping: M12
Gripping field: 0-26 mm
Gripping bolt: M16

ROTATING CLAMPS are wholly metallic, made of an electric high conductivity and high hardness special alloy. The wide contact surface, at maximum current allowed, limits the electric density to 0,3 A/mm² in order to avoid any overheating under high amperometric load. Special grease between the contact surfaces eliminates any microsparticle and grants a perfect current flow.
